

Family Nature Activities with Glenveagh National Park

Make a Bird Feeder!

It's a really important time of year to feed our birds, so follow the steps below to make your own at home!

WHAT YOU NEED:

- Bird seed (or some sunflower seeds)
- Cooking fat or nut butter
- 1 big orange

THE 'HOW TO' PART:

1. In a clean bowl, place some bird seed inside and add the cooking fat or nut butter.

(Top tip! If your cooking fat is cold warm it up with your hands!)

2. Mix both together with your hands or a wooden spoon! Once mixed together, set aside.

3. With your orange, cut it in half and scoop out all the delicious orange goodness! You are now left with the orange skin - fill it up with your seed mix and leave outside for the birds to pick at!
