

BEAN SPROUTING

Materials:

6 Broad Bean Seeds

Large Clear Plastic Bottle

Paper Towel

Scissors

Water

Rulers

Experiment 3

Instructions

An adult should help to make the plastic jar, as this could be dangerous.

1

Cut off the top & neck from the plastic bottle - 4cm off the top of the remainder of the bottle to make a plastic ring and set aside.

2

Put 3 sheets of paper towel together and fold in half.

3

Place the folded towels inside the container around the edge. Pour water into the container until it is about 3 cm deep.

4

Push the plastic ring into the container to support the paper towels:

- 1- Container
- 2- Paper towels
- 3- Plastic ring (pinning the paper towel against the side)

5

Push the beans in between the paper and the outside wall of the container.

6

Leave the container in a warm placel for 2-5 days. Ensure the paper towels stays moist.

Observe the bean sprouts!
What do you notice?
